#### **DETAILED ACTION**

### Information Disclosure Statement

1. The information disclosure statement filed 11/20/03 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

## Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
   The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite because it is not clear what function is referenced.

The claims are indefinite because it is not clear what is referenced as number of rotations.

The claims are indefinite because claim 1 requires the limits of number of rotations be a function of the load, but claims 6 and 7 present the limits in RPM units. By presenting the limits in RPM units number of rotations is presented a function of time, not a function of load.

Application/Control Number: 10/672,783 Page 3

Art Unit: 1746

Clarification is requested.

Claims are indefinite because they do not recite positive manipulative steps.

The clause, which claim 1 uses to present the method step recites "the control setting upper and lower limits...".

Thereby the claims are a mere recitation of the use of the control (controller) to perform some functions. Claims 2 ,4 and 5 only recite what the control sets. No manipulative steps are recited by the claims.

Claim 3 is indefinite because the term "the cycles" lack proper antecedent basis.

Claim 3 is indefinite because the term "a low number" is a relative term.

Claims 4 and 5 are indefinite because the term "the cycle of rotation" lacks proper antecedent basis. The claims are also indefinite because it is not clear what is referenced as "rotary profile configuration".

Claims 6 and 7 are indefinite because it is not clear how can the number of rotations be presented in RPM units.

## Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1746

5. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakane (US Patent NO 5,335,524).

Sakane teaches a method as claimed and teaches all profiles and RPM numbers as claimed. See entire document, especially Figure 3 and the related description and columns 1, 2, 5 and 6.

#### Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. GB 2,322,141 and US Patents 5,765,402, 6,581,230 and 6,415,469 are cited to show the state of the prior art with respect to controlling the washing machines.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Markoff whose telephone number is 571-272-1304. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr can be reached on 571-272-1414. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
